

We've got a story to share.

It's called the Qld Early Childhood Development Story. It focuses on 5 key messages about the importance of young children's development and each message is an important chapter in the story.

The 5 chapters are:

- Loving relationships
- Healthy environments
- Learning everywhere
- Strong connections
- Supportive communities

The Qld Early Childhood Development story lives on the ECEC website and each chapter has eye catching images, useful information and animations.

[Early Childhood Development](#)

Here are a few ways you could use them. You can:

- print the posters and display them or hand out to families/carers
- add the link to your website, social media page or newsletter
- use them as a starting point to have a yarn with families and/or a chat about child development with your staff
- link with some of your existing child development resources
- pop them in your Orientation pack for families/staff
- share them with other organisations

So join us in supporting and engaging your families and community to give every child a great start in the Early Years.
